CAPSTONE 2 – POST-PRESENTATION CHECKLIST (CRITIC)

Purpose: This checklist serves as a guide for the Panel Members in validating the completeness, quality, correctness, and overall merit of the Capstone Project during the Final Defense. It confirms whether the proponents have successfully implemented the approved proposal, achieved the stated objectives, properly interpreted their findings, and demonstrated sufficient understanding and ownership of the project.

A. SYSTEM/PROJECT COMPLETION

- ☐ Project implementation is successfully demonstrated
- ☐ Major features, components, or deliverables function as presented
- ☐ Demonstrated outputs remain consistent with the approved proposal
- ☐ Proponents can clearly explain the implementation and operation of the project

B. ALIGNMENT WITH APPROVED OBJECTIVES

- ☐ All approved objectives are reflected in the project outputs
- ☐ Presented evidence supports the attainment of the stated objectives
- ☐ Results demonstrate the accomplishment of the approved objectives
- ☐ Proponents can clearly explain how each objective was achieved

C. TESTING, EVALUATION, AND VALIDATION

- ☐ Testing procedures are appropriate for the project
- ☐ Testing and evaluation results support project effectiveness
- ☐ Findings are supported by sufficient evidence
- ☐ Proponents can justify the testing and evaluation procedures used

D. CHAPTER 4 – RESULTS AND DISCUSSION

- ☐ Results are presented clearly and accurately
- ☐ Findings are supported by data and evidence
- ☐ Statistical results, evaluations, or testing outcomes are correctly interpreted
- ☐ Proponents demonstrate understanding of the significance of their findings

E. CHAPTER 5 – CONCLUSIONS AND RECOMMENDATIONS

- ☐ Conclusions are supported by the project findings
- ☐ Conclusions directly address the project objectives
- ☐ Recommendations are practical and relevant
- ☐ Proposed enhancements or future improvements are appropriate

F. DOCUMENTATION QUALITY

- ☐ Technical content is accurate and consistent
- ☐ Documentation supports the presentation and demonstration
- ☐ References, citations, figures, and supporting materials are properly utilized
- ☐ Proponents demonstrate ownership and mastery of the manuscript

G. PROJECT-SPECIFIC REQUIREMENTS

♦ Software / Information Systems

- ☐ Security, privacy, and data integrity measures are appropriate and adequately explained
- ☐ Reports, dashboards, and system outputs support intended user requirements

- ☐ User roles, permissions, and access controls function as intended
- ☐ Data management features are properly implemented and justified
- ♦ [Network Design / Infrastructure Projects](#)
- ☐ Network diagrams accurately represent the proposed implementation
- ☐ Network topology and device selection are adequately justified
- ☐ Scalability considerations are realistic and appropriate
- ☐ Security measures and controls are clearly explained
- ♦ [IoT Projects](#)
- ☐ IoT architecture accurately reflects the implemented solution
- ☐ Communication protocols are appropriate and adequately justified
- ☐ Sensor integration, monitoring, and data acquisition function as presented
- ☐ Proponents can clearly explain device, gateway, cloud, and user interactions
- ♦ [Multimedia / Interactive Application Projects](#)
- ☐ Multimedia and visual components function as intended
- ☐ Design decisions are appropriate for the target audience
- ☐ Interactive features support the intended objectives of the project
- ☐ Accessibility and usability considerations are evident and justified
- ♦ [IT Management / Strategic IT Projects](#)
- ☐ Organizational assessment is supported by evidence
- ☐ Proposed strategies, policies, or frameworks address identified needs
- ☐ Risks and implementation considerations are realistic and well discussed
- ☐ Recommendations are practical, actionable, and defensible

[H. PRESENTATION AND DEFENSE PROPER](#)

- ☐ Presentation is clear, organized, and professional
- ☐ Demonstration supports the claims presented in the manuscript
- ☐ All members participate meaningfully during the defense
- ☐ Responses are accurate, relevant, and technically sound
- ☐ Group demonstrates understanding and ownership of the project

[I. OVERALL ASSESSMENT](#)

- ☐ The project satisfactorily meets the requirements for completion
- ☐ The project demonstrates technical, professional, or organizational merit
- ☐ The project is recommended for approval subject to compliance with required revisions

[FINAL PANEL DECISION](#)

- ☐ Approved
- ☐ Approved with Minor Revisions
- ☐ Approved with Major Revisions
- ☐ For ReDefense

[General Comments and Recommendations:](#) _____
