CAPSTONE 2 – PRE-PRESENTATION CHECKLIST (ADVISER)

Purpose: This checklist serves as a guide for advisers in evaluating the completeness, compliance, technical readiness, and overall preparedness of a Capstone Project prior to the Final Defense. It verifies that the approved proposal has been properly implemented, evaluated, documented, and aligned with the objectives established during Capstone 1.

A. SYSTEM / PROJECT COMPLETION

- ☐ Project implementation is completed and operational
- ☐ Major features, components, or deliverables are available for demonstration
- ☐ Project outputs are consistent with the approved proposal
- ☐ System/project is ready for final presentation and evaluation

B. ALIGNMENT WITH APPROVED OBJECTIVES

- ☐ All approved objectives have been addressed
- ☐ Project outputs support the attainment of the stated objectives
- ☐ Evidence of objective accomplishment is presented

Adviser Reminder: Failure to satisfactorily address approved objectives may be grounds for major revision AND re-defense.

C. TESTING, EVALUATION, AND VALIDATION

- ☐ Appropriate testing procedures have been conducted
- ☐ User evaluation or validation has been completed, when applicable
- ☐ Results are properly documented and supported by evidence
- ☐ Findings demonstrate the effectiveness and functionality of the project

D. CHAPTER 4 – RESULTS AND DISCUSSION

- ☐ Project implementation, outputs, and results are adequately documented
- ☐ Features, components, or deliverables are clearly presented and discussed
- ☐ Testing and evaluation results are properly interpreted
- ☐ Findings are supported by data, evidence, and analysis

E. CHAPTER 5 – CONCLUSIONS AND RECOMMENDATIONS

- ☐ Conclusions are based on the findings of the study
- ☐ Conclusions directly address the project objectives
- ☐ Recommendations are relevant, practical, and achievable
- ☐ Opportunities for future improvement or enhancement are identified

F. DOCUMENTATION QUALITY

- ☐ Prescribed format and documentation standards are followed
- ☐ Content is clear, organized, and technically sound
- ☐ References and citations are properly presented
- ☐ Tables, figures, appendices, and supporting documents are properly labeled
- ☐ No evidence of plagiarism or academic misconduct

G. PROJECT-SPECIFIC REQUIREMENTS

- ♦ Software / Information Systems

- ☐ User roles, permissions, and access controls are properly implemented, where applicable
- ☐ Reports, dashboards, or analytical outputs support user and organizational requirements
- ☐ Data management provisions (e.g., validation, backup, recovery, archival) are incorporated where appropriate
- ☐ System security, privacy, and data integrity considerations have been addressed

♦ **Network Design / Infrastructure Projects**

- ☐ Existing, logical, and physical network diagrams are complete, updated, and consistent
- ☐ Network topology and device selection are appropriate for organizational requirements
- ☐ Scalability and future expansion considerations are incorporated into the design
- ☐ Network security requirements and controls are clearly identified

♦ **IoT Projects**

- ☐ IoT architecture clearly defines the interaction among devices, gateways, cloud services, and users
- ☐ Communication protocols and connectivity requirements are appropriate for the intended environment
- ☐ Sensor data acquisition and monitoring mechanisms are properly established
- ☐ Deployment, operational, and power considerations have been adequately addressed

♦ **Multimedia / Interactive Application Projects**

- ☐ Multimedia assets are original, licensed, or properly attributed
- ☐ Visual design is appropriate for the intended audience and purpose
- ☐ Interactive elements effectively support user engagement and usability
- ☐ Accessibility and user experience considerations have been incorporated, where applicable

♦ **IT Management / Strategic IT Projects**

- ☐ Organizational environment and existing processes have been properly assessed
- ☐ Proposed policies, frameworks, or strategies are aligned with organizational needs
- ☐ Risks, constraints, and implementation considerations are clearly identified
- ☐ Recommendations support long-term organizational improvement and sustainability

H. READINESS FOR FINAL DEFENSE

- ☐ Presentation materials are complete, organized, and aligned with the manuscript
- ☐ Demonstration is prepared and functioning as intended
- ☐ All members can explain the project and their respective contributions
- ☐ Adviser recommends the group for Final Defense

FINAL ADVISER DECISION

- ☐ **Ready for Final Defense**
- ☐ **Not Ready for Final Defense**
